

CURBSIDE YARD WASTE AND BROWN GOODS REMOVAL: Friday September 14th, 2018 @ 10: AM

During this period of time when heavy rains are expected we would ask that residents NOT place any yard waste or brown goods at the street until the storm has passed. The reason is that in periods of heavy rainfall curb-side wastes placed over the curb line or in ditches may wash into the storm-water collection system and make an already overburdened system even worse. This could cause flooding on properties where storm-water inlets are in the adjacent rights-of-way. So please refrain from placing waste on the street until Hurricane Frances moves through the area next week.

We are working diligently today to remove what is already at the curb to improve this situation.

Thanks in advance for your cooperation.
